TECHNICAL INFORMATION

TECHNICAL CHARACTERISTICS OF THE PARALLEPIPEDAL TANKS MANUFACTURED BY INPRE S.L.

The Paralepiped Tanks for air conditioning, Water storage, recovery and other industrial uses manufactured by INPRE S.L. are made from hot-rolled sheet metal certified to AISI304 quality (or higher depending on the water to be contained) according to UNE EN 10088, electrically welded by welders using procedures approved according to UNE EN 287 and 288 when required.

These tanks are designed to withstand water at atmospheric pressure, depending on the model, and temperatures of up to 65°C.

They are also equipped with PN10 threaded or flanged connections according to UNE EN 1092-1 and manhole door for internal inspections.

INPRE S.L. guarantees the SAFETY of the product, as all tanks are tested to certify the absence of leaks and deformations.

Therefore, INPRE S.L. guarantees the quality of the product against any manufacturing defects and provides a warranty in accordance with Law 23/2003, of July 10, on Guarantees (BOE No. 165, of July 11, 2003, pp. 27160-27164), provided that the warranty conditions are met.

Finally, INPRE S.L. complies with UNE-EN 1508:1999-07-20 WATER SUPPLY - REQUIREMENTS FOR SYSTEMS AND COMPONENTS FOR THE STORAGE OF WATER, and each unit is accompanied by its corresponding manufacturing certificate.

Sincerely,
